# INSTRUÇÕES DE MONTAGEM JUNTAS HOMOCINÉTICAS

## DESMONTAGEM:

- Levantar o carro de forma segura;
- Soltar os parafusos da roda, assim, como a porca de fixação da homocinética;
- Retirar a roda;
- Soltar o pivô e afastar para baixo com a ajuda de uma alavanca;
- Empurrar o cubo de roda para fora e de preferência soltar o eixo inteiro e utilizar uma morsa para prendê-lo;
- Soltar as abraçadeiras da coifa da homocinética;
- Soltar a homocinética do eixo, tomando o cuidado de verificar a trava da homocinética, utilizar a ferramenta correta;
- Após soltar a homocinética retire-a assim como a coifa;
- Verificar se o semieixo tem alguma avaria ou problema.

## MONTAGEM:

- Colocar a coifa nova no semieixo;
- Aplicar na homocinética metade da graxa disponível no tubo que acompanha o produto e espalhar bem para que ela fique lubrificada;
- Encaixar a homocinética no eixo utilizando a ferramenta correta, para não danificar o produto (não utilizar martelo de metal);
- Movimentar a homocinética no eixo para verificar o encaixe;
- Lubrificar a coifa com a outra metade da graxa que restou no tubo;
- Encaixar a coifa na homocinética;
- Apertar ambas as abraçadeiras de forma que não fique frouxa, mas também não tão apertada, as duas formas podem vir a danificar a peça;
- Encaixar o semieixo novamente no carro;
- Recolocar o cubo de roda e as partes de suspensão no lugar;
- Apertar a porca da homocinética;
- Recolocar a roda e os parafusos no lugar;
- Abaixar o veículo com segurança.

## CUIDADOS E PRECAUÇÕES

- Sempre que possível verificar o estado das coifas, são elas que tem a função de evitar que entre sujeira, água ou qualquer resíduo na tulipa, deslizante e homocinética, além de manter a peça sempre lubrificada para que não haja desgaste.
- Quando fazer a troca de alguma peça utilizar todos os produtos que acompanham o item mesmo que o antigo aparente estar em bom estado
- Tomar cuidado na colocação das abraçadeiras das coifas para que não haja o rompimento da mesma e nem a entrada de resíduos.
- Utilizar somente a graxa que acompanha o produto ou a indicada para esta finalidade.
- Verificar o espaço entre o sensor e anel ABS (caso tenha sistema ABS no veículo). O ajuste deste espaço deve seguir as instruções do fabricante do veículo, caso esta informação não seja encontrada, deixar de 0,4 a 1,1mm.

## GARANTIA LINHA DE TRANSMISSÃO DEVIGILI

A Devigili & Varity tem como objetivo sempre fornecer produtos da melhor qualidade para nossos clientes, dessa forma, todos os produtos da Linha de Transmissão Devigili são importados para o Brasil de fábricas confiáveis e passam por testes de qualidade periodicamente.

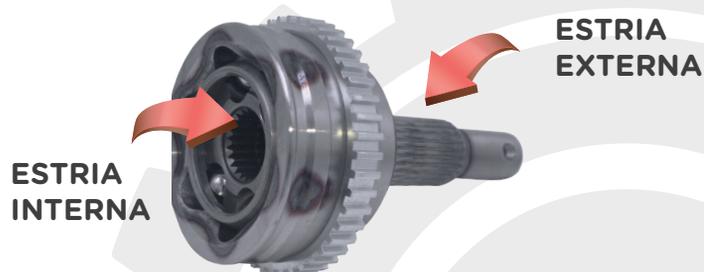

Para que o processo de garantia ocorra, são necessárias algumas condições mínimas dos produtos a serem analisadas antes da solicitação.

- Ter gravado na peça o nosso código de identificação
- O produto deve ter a coifa que estava em uso (Tulipas, Homocinéticas e Deslizantes).
- Ter a coifa em perfeito estado (não pode estar RASGADA).

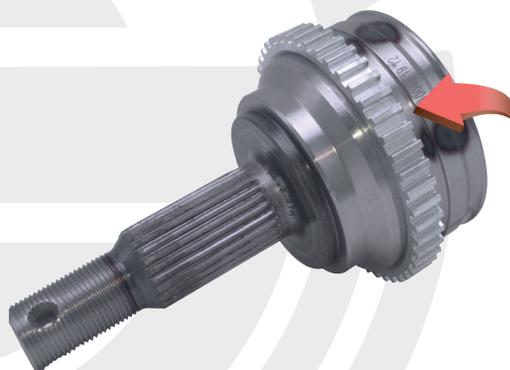

As coifas protetoras servem para proteger a junta homocinética de contaminação de abrasivos, água e reter a graxa dentro da mesma mantendo a lubrificação adequada da peça. Por este motivo não será concedida garantia de peça sem a coifa, com a coifa rasgada ou com uma coifa que não seja a original que acompanha o nosso produto, pois dessa forma não há como ter certeza que a peça não foi danificada.
